NGI EXPLORERS PROGRAM

dew MOBILITY

CHALLENGE #2 - DM-CITIES-01

→ **Architect and design a general purpose algorithms which can address machine learning solutions. The Software /algorithm need port on any ARM or Intel CPU/MCU to compute a database supplied by Cities/ Municipalities**

GOALS

To provide proof of concept of ML/AI solutions for smart city applications

DETAILS

Machine learning and Artificial Intelligence software to address smart city applications.

SKILLS REQUIRED

Looking for research scholars, PhD or any one from Industry background.

Researchers	
Innovators	
Artificial Intelligence	**Blockchain**
Big Data	**Internet of Things**
5G	**Cybersecurity**
Cloud/Edge Computing	Interactive Technology
Future Hyper-connectivity	Human-centric Internet

→ **READ THE GUIDELINES**
