INTERNATIONAL INNOVATION AWARD FOR SUSTAINABLE FOOD AND AGRICULTURE

Celebrating inspiring success stories
of innovation and innovators

The call for
nominations
is now open!

We are calling on individuals, private companies or institutions to submit a nomination for one of the following categories before 28 February 2019.

- **Award for Digitalization and Innovation for Sustainable Food Systems (USD 40 000)** - Innovations that impact more than one level of supply chain and strengthen the link between farmers and consumers
- **Award for Innovations that Empower Youth in Agriculture and Food Systems (USD 20 000)** - Innovations that strengthen the role of youth (under 35) in agriculture and food systems

Family farmers, who already produce 80% of the world's food, depend on innovation to feed the future. Innovation is the central driving force which will transform food systems, lift family farmers out of poverty and help the world to achieve food security, sustainable agriculture and the Sustainable Development Goals (SDGs).

Agricultural innovation means using an existing tool, practice or technology and applying it to a new context, or using a new idea to solve an old problem.

We want to hear how your innovation is contributing to the global effort to reach Zero Hunger.

Remember to make your application using the official nomination form and to send it before the call closes on **28 February 2019!**

Read more about the general terms and conditions of the Award online.

The International Innovation Award for Sustainable Food and Agriculture is funded by the Federal Government of Switzerland. It is limited to innovations related to agriculture and pastoral systems only, in accordance with the requirements and technical competencies of the Donor.
