Sahel Agri-Sol: Bridging Sahelian and West African Farmers with Global Markets

Sahel Agri-Sol, a pioneering Malian enterprise, is dedicated to facilitating the access of premier agricultural goods from the Sahel and West African regions to discerning global consumers.

Our foundation rests on the principles of inclusive economic growth, aiming to forge sustainable pathways for agricultural communities while safeguarding their traditions and natural heritage.

Through close collaboration with agricultural cooperatives and producers across the Sahel and West Africa, we ensure equitable compensation for their exceptional crops, fostering prosperity and resilience within rural landscapes.

We specialize in a diverse array of Sahelian and West African products, including coffee, cashew nuts, sesame, soybeans, maize, and gum arabic alongside value-added products from mangoes, maize and cocoa. Additionally, we champion the exportation of other high-value added agricultural products such as shea butter, soybean flour, cassava flour and maize flour.

At Sahel Agri-Sol, sustainability is our paramount concern. We work intimately with farmers to deploy climate-smart agricultural practices, preserving the delicate balance of the Sahelian and West African ecosystems.

Committed to reducing our ecological footprint, we have initiated renewable energy adoption and recycling programs.

Our steadfast commitment to quality is upheld through stringent quality control measures, ensuring compliance with the most rigorous international standards.

Join us in our mission to cultivate a more sustainable future for Sahelian and West African farmers by selecting Sahel Agri-Sol as your preferred partner for top-tier agricultural products.

Infusion

Moringa Infusion

Packed with vitamins, minerals, and antioxidants, Moringa is a true superfood that nourishes the body and mind from within. Our Premium Moringa Infusion captures all of these benefits in a delicious and convenient form, making it easier than ever to incorporate this nutritional powerhouse into your daily routine.

Kinkeliba Infusion

Our Kinkeliba Infusion is a symphony of nature's finest botanicals, expertly curated to deliver a sensory delight with every cup. Immerse yourself in the invigorating essence of Kinkeliba, complemented by the subtle warmth of Ginger, the refreshing notes of Mint, the citrusy zest of Lemongrass, the comforting aroma of Clove, and a myriad of other therapeutic plants.

Djeka Leaves Infusion

Beyond its exquisite taste, Djeka Leaves are revered for their myriad health benefits. Rich in antioxidants and nutrients, our infusion not only delights the senses but also nurtures the body, offering a natural boost to overall wellness.

Hibiscus Infusion

Beyond its exquisite taste, our Hibiscus Infusion is revered for its myriad health benefits: lower blood pressure, supports heart health, relieves digestive disorders, etc.

Ola Up Infusion

Drawing inspiration from the lush landscapes of Burkina Faso, Ola up Infusion combines a harmonious medley of Vetiver stem, Fennel seed, young mango leaf, Laurel leaf, Djeka leaf, and an array of other medicinal plants. Each ingredient is meticulously selected for its purity, potency, and flavor profile, ensuring a truly exceptional drinking experience with every sip.

**Outgrowing
Program**

Leader in the export of agricultural products, Sahel Agri-Sol is pleased to propose its outgrowing program to guarantee a reliable supply of high-quality ingredients.

Why choose our outgrowing program?

Supply security: Plan your needs and ensure the availability of your raw materials.

Premium quality: Benefit from certified products meeting your most demanding specifications.

Standards compliance: Ensure compliance with environmental and social standards.

Sustainable relationship: Develop a win-win partnership with Sahel Agri-Sol.

We grow your ingredients according to your specifications

- High protein content
- High oil content
- Specific variety (soybean, sesame, etc.)
- And much more!

Crops involved

- Coffee
- Cocoa
- Soybean
- Sesame
- Cassava
- Other crops upon request

Duration of the program

Setting up a contract farming program requires significant investments in time and resources. Therefore, to ensure optimal effectiveness, we recommend a minimum duration of one year for this program. For those seeking a more comprehensive and long-term solution, we offer competitive prices for contractual commitments extending over a period of 3 to 5 years.

Ready to embark on a journey of innovation and success?

Contact our dedicated team to discuss your specific needs and unlock a world of creative possibilities for your brand. Together, let's shape a future that celebrates both innovation and sustainability.

A cute, grey cartoon elephant with large ears and a trunk is standing on a dirt path in a sunlit forest. The elephant is looking towards a white sign on a wooden post. The sign has the words "Payment Terms" written in a bold, green, serif font. The background is a lush green forest with sunlight filtering through the trees, creating a warm and inviting atmosphere. There are some small pink flowers and green plants in the foreground.

**Payment
Terms**

1. Stand-by letter of credit SBLC MT 760

We prefer utilizing the SBLC MT 760 payment term, as it provides mutual assurance and facilitates competitive pricing for both parties in our transactions. By employing the Stand-by Letter of Credit (SBLC) MT 760, we can offer your company highly competitive Free on Board (FOB) or Cost, Insurance, and Freight (CIF) prices.

To proceed with this payment arrangement, the buyer is requested to issue a Stand-by Letter of Credit (SBLC MT 760) covering the total amount for the one-year delivery period. This SBLC should guarantee 100% payment for each monthly delivery upon the submission of the Bill of Lading and the SGS Inspection Report.

It's important to note that the Stand-by Letter of Credit must be issued by a reputable financial institution, such as Standard Chartered, Bank of China, or an equivalent institution of similar credibility.

2. Promissory Note (PN) for One-Time Transaction

We opt for the use of promissory notes as they foster mutual assurance and facilitate competitive pricing for both parties involved in our transactions. Leveraging the promissory note enables us to extend highly competitive Free on Board (FOB) or Cost, Insurance, and Freight (CIF) prices to your company.

To proceed with this payment arrangement, we kindly request the buyer to issue a promissory note covering the total amount for the delivery. This PN should ensure 100% payment upon the submission of the Bill of Lading and the SGS Inspection Report.

It is imperative to emphasize that the promissory note must originate from a reputable financial institution, such as Standard Chartered, Bank of China, or a comparable institution of equivalent credibility.

3. Letter of Credit (LC)

While the letter of credit is not our preferred payment method due to the necessity of covering expenses before receiving payment, we are willing to consider it. However, it's important to note that competitive pricing may not be feasible with payment by letter of credit.

To proceed with this payment arrangement, we kindly request the buyer to issue a letter of credit covering the total amount for one year of delivery. This LC should guarantee 100% payment for each monthly delivery upon the submission of the Bill of Lading and the SGS Inspection Report.

It is crucial to emphasize that the letter of credit must be issued by a reputable financial institution, such as Standard Chartered, Bank of China, or a comparable institution of equivalent credibility.
